

# SHARPY PLUS

## A NEW REVOLUTION: THE FULL HYBRID

The biggest revolution in recent years was the Sharpy with its narrow concentrated beams. Today this iconic product has a worthy successor: the SHARPY PLUS, the first true **100% HYBRID** unit, able to be a perfect beam light and a perfect spotlight.

Just as the Sharpy was a beam moving light for all budgets, the SHARPY PLUS too is the first hybrid unit that everyone can afford, or better, that everyone will

want to buy. Because there are no other more versatile lights on the market. It is suitable for every occasion, with an extraordinary luminous efficiency which ensures substantial savings through lower power consumption.

The SHARPY PLUS is a small gem of lighting technology, and yet another example of Claypaky's tradition for innovation. It fits an **Osram Sirius HRI® 330W X8 lamp**. Claypaky has pragmatically chosen a discharge lamp for this unit, which is bound to sell widely, since, when you are seeking extraordinary yet cost-efficient performance, it is still the technology that ensures the best lumen/watt ratio and best \$/watt operating costs. The lamp used in the SHARPY PLUS, moreover, has top ranking performance.

The SHARPY PLUS weighs only 23 kg (50.7 lbs), and all its functions are extremely quick. Its body is slightly

larger than the Sharpy's, to house a high quality optical unit with a zoom that ranges from 3° to 36°. Without this lens, the SHARPY PLUS would not be the full hybrid light that everyone wants.

Its minimum beam angle of 3° makes it possible to generate the narrow parallel light beams essential for beam light mode. Its wide zoom range also allows large beam angles, which makes the SHARPY PLUS a perfect spotlight for all purposes.

The SHARPY PLUS has two independent operating modes: in **BEAM mode**, the aerial effects are enhanced by the way the Sirius lamp is made. It is capable of extraordinary power output (over 300,000 lux at 10m distance), which the optical unit enhances through a marked hot spot.

In **SPOT mode**, the light is diffused in

a more even way which means visual effects can be projected with excellent uniformity. Its **3° to 36° (1:12) zoom** covers the entire range **linearly**, both in spot mode and in beam mode. This feature makes the SHARPY PLUS unique on the market.

It has the widest range of effects and color production tools ever seen for a light of this size and in this power category. The color system is at the cutting edge technologically. Unlike other lights, which only have fixed colors, the SHARPY PLUS has a CMY system with three hybrid wheels. They

are used partly for accurate, complete color mixing, and partly to produce fifteen special colors. It also fits two CTO filters.

There are eight rotating glass gobos and eighteen fixed gobos for the aerial and projected visual effects, including six beam reducers for beam mode. There is also a four-faced prism and an eight-faced prism; the two prisms are independent and can be superimposed. Lastly, there is even a beautiful animation wheel, which can be combined with the gobos, and a linear frost effect to create soft edges.

### THE FULL HYBRID REVOLUTION HAS BEGUN!

The SHARPY PLUS has no match. With its wide range of effects and high light output, it beats all the lights in the same category and comes very close to those of higher wattages, but with a much more appealing price tag.

### SHARPY PLUS, THE TRUE FULL HYBRID: 100% BEAM LIGHT, 100% SPOTLIGHT

SHARPY PLUS: high Claypaky quality for units that will ensure their owners the best operating costs and quickest return on investment.

## MAIN FEATURES

- Source: Osram Sirius HRI® 330W X8 arc lamp
- Two projection modes: Beam and Spot
- 3°- 36° linear zoom in both modes
- CMY color mixing
- 15 colors on 3 wheels
- 2 CTO filters
- Rotating Gobo Wheel: 8 glass gobos
- Static Gobo Wheel: 18 fixed gobos (incl. 6 beam reducers)
- Rotating 4-facet prism on dedicated channel
- Rotating 8-facet prism on dedicated channel
- Animation wheel
- Linear, soft edge frost filter
- Dimmer and stop/strobe
